Keeping in Character

The **Alitherm Heritage Window** range has been developed to suit both new build and refurbishment projects.

Ideal for Victorian and Art Deco designs, the windows are available in both tilt and turn and standard casement.

HIGH
STRENGTH AND
COST-EFFECTIVE
ALTERNATIVE
TO TRADITIONAL
STEEL WINDOW
SYSTEMS

Timeless Elegance with Modern Features

Each window replicates the distinctive slim profiles and sight lines of traditional steel windows, which were so prevalent in the early and mid-1900s. However, the timeless elegance of Alitherm Heritage is also accompanied by the outstanding thermal performance of a modern aluminium system, with each window delivering a 'B' Energy Rating.

A modern thermal aluminium solution for both heritage and refurbishment projects where the requirement to replace old steel windows is essential.

Create the Perfect Entrance with the Alitherm Heritage Entrance Door

Designed to faithfully replicate the appearance of traditional Crittall steel products, the Alitherm Entrance door is a popular choice in listed building and conservation area property renovations and meets all the requirements of current Building Regulations.

Available in single and double formats, as well as a French door option, **Alitherm Heritage Doors** feature slim profiles to give you the perfect timeless elegant entrance, accompanied by high levels of quality and performance.

Available in a wide range of sizes, and colours as well as various locking and security options.
